

GW1 Wireless Module for use with Gas & Water Meters

Features

- Interface with water and gas meters equipped with pulse output (solid-state or reed switch.)
- Includes 120 VAC power supply module.
- Compatible with E-Mon D-Mon wireless metering systems.
- Plug-and-play installation. Self-configures to the wireless mesh network.
- Contains local storage for 2+ months of 15 minute interval data.
- Allows creation of graphs, charts and usage statements via E-Mon Energy software.
- Wireless transceiver is FCC certified not to interfere with existing infrastructure.
- Wireless mesh network operates in the 915 MHz frequency hopping spread-spectrum license-free band. No cellular wireless service contracts are required.
- Wireless modules can be mounted inside buildings within approximately 500 feet line-of-sight from each other and up to 200 feet through walls, depending on wall material.
- Automatic time synchronization.
- Automatic network acquisition at power ON.
- Utilizes EKA Systems technology.

Dimensions: 7" H x 3" W x 2" D
